

AIR CONDITIONING JACKS

SPECIFICATIONS

Shipping Weight 144 lbs.

System Capacity
6 foot width 4000 lbs.
10 foot width 2000 lbs.

Speeds On Deck Operations

Minimize downtime working around air conditioning units with Garlock's Air Conditioning Jacks. This system will raise air conditioning units eighteen inches off the roof, perfect for access with the Garlock Mini Saw or hand scrapers.

Interlocking Expansion

All jacks interlock to allow the system to extend six feet wide without extensions and up to ten feet with extensions. The sliding clamp mechanism on support rails is adjustable to accommodate a variety of air conditioner sizes and configurations. Each system consists of six pieces - four jacks with two extension bars. Each jack is rated at 2000 lbs., with a total system capacity of 4000 lbs.

Protects Roof

The large $4 \frac{3}{4} \times 8 \frac{1}{4}$ " base on the jacks not only protects the roof, but also guarantees a stable position for operating around air conditioning units.
