Bulk Caulk Loader

315 Bulk Caulk Loader

Say goodbye to countless tubes of caulk forever. For the ultimate caulk gun filling system give the 315 Bulk Caulk Loader a try. Buy your caulk material by the 5 gallon pail and you'll not only minimize handling but you'll save money on caulk and pay for the machine. Our heavy-duty construction is designed to minimize wasted material, speed production and last a very long time.

- Maximum power for filling in cold weather
- Heavy-duty seal keeps air away from material
- Holds 5 gallon pails of caulk material
- Screw type feed mechanism forces caulk into gun with a minimum of effort
- Two pail seals available. "Buna" is the standard seal or an optional "Viton" for caustic materials

Fills our 24 oz. and 32 oz. bulk caulk guns

Seam Finishing Tools

For the ultimate in seam finishing performance give the Garlock seam finishing tools a try. These innovative machines do away forever with crawling along on hands and knees with a hand roller trying to seal seams. Gain positive adhesion in a consistent, reliable manner day after day. Most material manufacturers approve our seam finishing tools.

Available in gas or electric models these seam finishing tools are light-weight, self-propelled and greatly increase production over manual methods.

The seam finishing tool works by setting a 14" diameter rotating disc of 8 rollers over the seam to be sealed. Positive machine weight over the rollers insures that all rollers contact the material surface. The machine will walk itself forward at a steady pace and feather out air pockets and fish mouths.

Specifications

	370E Electric	380G Gas
Weight	160 lbs.	160 lbs.
Length	60"	60"
Width	20"	20"
Height	36"	36"
Motor	115 volt 6 amp	—
Engine	—	5 hp Tecumseh

Material Mixers

The secret to maintaining consistent material composition throughout the barrel or pail is to keep the material thoroughly mixed. Many materials will settle over time and the solid content will sink to the bottom of the barrel. This can make your pump work harder and the spray pattern erratic. To solve this problem, Garlock offers several material mixers to improve both pump and spray performance.

5 Gallon Pail Mixer

This handy little mixer attaches to the end of a 1/2" drill and comes fitted with a cover. Simply put the mixer into a 5 gallon pail, turn it on and remix your material.

Check with material manufacturers for guidelines on mixing certain materials.

55 Gallon Barrel Mixers

These handy mixers take the hard work out of mixing a drum of material. Available in a gas model or electric model, these mixers clamp right onto the side of the barrel. Simply turn them on and mixing is automatic and easy. Throw that stick away forever. Do it the fast, easy "effective" way with Garlock barrel mixers.

Specifications

600G Gas Barrel Mixer

2 hp Gas Engine
2 Cycle
Adjustable Speed to 90 rpm
50 lbs.

600E Electric Barrel Mixer

1/6 hp Electric Motor
110 volt
Constant Speed at 90 rpm
50 lbs.

Flexible Pail and Drum Heaters

These powerful belt heaters wrap the 5 gallon pail or 55 gallon drum and warm the material in the container. In cases where high volume output is not required, these 110 volt belt heaters can be the perfect solution toward reducing material viscosity.
