# PCR-30 ROUTER

## BETTER ROUTING FOR BETTER CRACKSEALING

- Electric Start 30 hp Kohler Engine – 20% More Power for Smoother Cutting
- Patent Pending Quick Stop Anti Kick-Back Braking System
- Heavy-Duty Roller Bearings on Drum
- Height Adjustable, Shock-Mounted Handles Eliminates Vibration
- Lower Wider Stance for Stability
- Easy Access to Lifting Actuator
- Simple Start-Up and Operation
- Simple Depth Adjustment with Dial and Arrow Indicator
- Clear View of Bomb Site Style Pointer
- Polyethylene Fuel Tank

**1** Electric start 30 hp Kohler engine is industrial strength for low-maintenance, continuous use in the harshest conditions. High horsepower provides smooth routing.

**2** Raise cover for easy drum maintenance.

- Two-piece drum is balanced for low vibration and is supported by heavy-duty roller bearings for a 400-percent increase in load capacity. Clear view of bomb site pointer.

**3** **Cut Control** - get accurate cuts every time with this new patent pending option. Simply set the switch to auto and dial in the cut depth. Raise the machine to reposition the router over the next crack and flip the switch back to auto. The router will return to the exact depth of the last cut. Make minor adjustments by turning the cut control knob.

- Handles are height adjustable for operator comfort and utilize dual shock absorbers to eliminate vibration.
- Belly-Bar hands free emergency engine shut down.

**4** **Quick Stop II** anti-kick back braking system. This Patent Pending feature stops all backwards travel with its positive locking hubs when the handles are released. Even with the system engaged, forward travel is not affected.

#### OPTIONS

- Cut Control Automatic Depth Adjustment
- Travel Assist for Self-Propelled Transport
- Gauge Package
- Hour Meter

Proper cracksealing starts with routing a uniform channel. Extend the life of your pavement by routing, cleaning and applying sealant with a quality Cimline melter applicator available by contacting your Cimline dealer.
