

HydraSaw

Always First To Finish

No other roof cutter puts as much power to the blade as the HydraSaw. Our fully hydraulic blade drive system allows you to power through the toughest jobs in the shortest amount of time. Gone are the days of loose or broken belts, gone are loose or misaligned pulleys all because these high maintenance parts have all been eliminated with the HydraSaw. You know that when a roof cutter breaks down it doesn't happen in the shop - it happens on the roof in the middle of the job. Downtime means means lost productivity, and with crews standing around, costs go through the roof in a big hurry. The HydraSaw's streamlined design gives you the cleanest mechanical design possible by eliminating many of the high-maintenance components found on regular roof cutters.

Features

- Hydraulic Blade Drive
- 13 HP Honda Engine
- Left Hand Cut
- Foot Operated Depth Control
- No Belts or Pulleys

PRODUCTIVITY

= PROFITS
