

RAM

110 CONVERTIBLE by GARLOCK EQUIPMENT

RUBBERIZED ASPHALT MELTER

The 110 Convertible RAM is the latest innovation to help contractors reach restricted access areas like high rises, narrow ally's, parking garages, garden areas or construction sites. Built specifically to melt heat-sensitive rubberized waterproofing materials, the 110 Convertible RAM has all of the features of the standard RAM's but with a portable service rack unit that detaches from the main transport trailer. You are able to move just the heating tank to where you are working.

Modular design allows for separation of the heating unit from the transport trailer in 3 easy steps.

1. Lower service rack unit.

2. Roll heating tank onto service rack.

3. Detach service rack from transport trailer.

Wheel service rack into freight elevators or through tight access areas.
