

Versa-Lift

Where Better Engineering Comes Out on Top

- Stand Alone Material Handling System
- Up To 125-feet Up And Unlimited Horizontal Reach
- Towable Convenience
- Faster And Easier Than Hoists
- Less Expensive Than Cranes
- Light Weight

One Man Operation...Ready in Fifteen Minutes

Compare the convenience, cost and versatility of any other lifting method and discover the advantages of Versa-Lift. No more CDL paperwork needed or half-day set-up. Unit tows behind 1/2-ton or larger pick-up

and in fifteen minutes you are transferring a wide range of materials up to 125-feet vertically. Knuckle-joint allows you to bridge onto other roof tops.

Imagine the material handling possibilities:

- Full pallets up to 660 pounds
- Rolled material
- Gravel
- Metal roofing material

Versa-Lift Set-Up

1. Position Versa-Lift
2. Extend outriggers
3. Hydraulically raise assembly
4. Rotate rails toward landing point
5. Rest headrail wheels against building

WORK SMARTER WITH VERSA-LIFT

Fully hydraulic operation means precise, simple control and reliable performance. Remote control cable allows full view of the hoisting operation.

Set-up in 11 x 20-foot area and minimize damage to lawns or other surfaces. Or set-up as much as 60-feet from building and load from the street.

Minimal maintenance required. Simply change engine oil, check hydraulic fluid levels and grease several fittings. Rails slide on no-lube polyimide guides.

Lockable cabinet encloses gas engine with electric start that powers hydraulic system.

Lifting attachments allow you to handle almost any material or object. Choose from: slate and tile platform, rolling equipment platform, trash discharge system or gravel bucket which can load as much as 20-tons per hour.
