

# SLICER CARBIDE BLADE

## SPECIFICATIONS

Diameter .....12"  
Arbor .....1"  
Weight .....3 lbs.  
Cutting depth .....3"

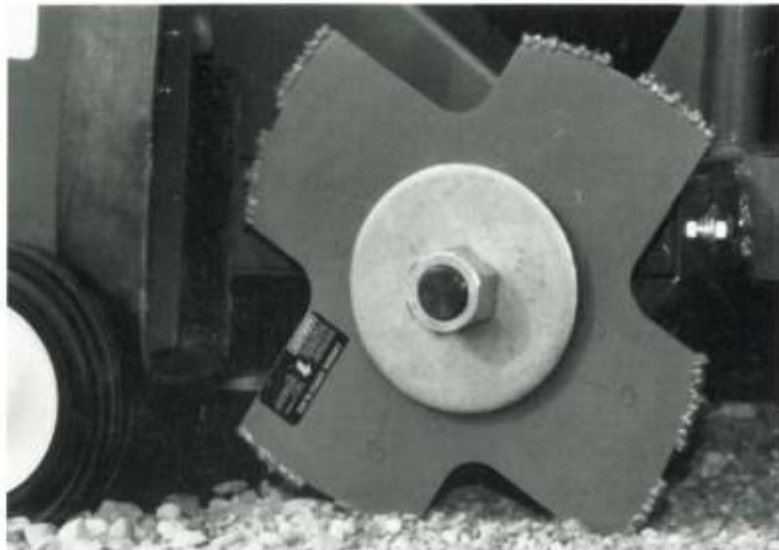

200% more carbide (15" blade) than standard blades

**Garlock's Slicer Carbide Blade** is designed specifically for tough resaturated BURs and pitch jobs.

**Hundreds of random carbide edges** shave away layers of tough asphalt much more smoothly and efficiently than standard carbide blades.

## THE TOUGHEST BLADE IN THE BUSINESS

### Slicer Cuts Through The Toughest Roofs With Ease

Garlock specially designed the new Slicer Carbide Blade to cut through the toughest roofs quickly, efficiently, and safely. While standard blades chop through the entire roof system at one time, the Slicer uses hundreds of random carbide edges to shave away each layer in a much smoother process, without sacrificing the speed of a standard blade.

### Fewer Blade Changes Means Higher Efficiency

Because of its advanced design, the Slicer Carbide Blade can outlast as many as five standard carbide blades on tough "resat" jobs. The Slicer's long life significantly reduces down time for blade changes.

### The Blade Of Choice For Tough Jobs

The Slicer's smooth cutting action makes it the best choice for tough resaturated BURs and pitch jobs. The blade's "shaving" action greatly reduces the heat, smoke, dust and sparks caused by standard blades that have been pushed beyond their design limits. And the smooth operation significantly reduces wear and tear on both the cutter and its operator.

# Angler Carbide Blades

from the people who invented Roof Cutters

- Carbide tips angled steeper for most efficient cutting performance ever achieved.
- Cuts cleaner and holds up longer.
- Full 1/4" of carbide on each cutting edge ( $7/32 \times 1/4 \times 2 1/4$ ).
- Choose between standard *Angler* blade with two cutting edges or the Quad *Angler* with four cutting edges.
- Blades fit on competitive models.
- 12 1/4" overall length.

Garlock's new *Angler* Blades are designed to handle the toughest jobs — including resaturated BUR's.

Cuts cleaner — Holds up longer
