Mustang HW with Gravel Spreader

The Mustang HW also can carry a 36" wide gravel spreader. Our heavy-duty gravel spreader features a 6.0 cubic foot capacity with an adjustable door opening to accommodate pea gravel up to 2 1/2" rock. Control rock dispensing simply by making just one easy adjustment. Gravel Spreader Capacity: 6.0 cubic feet.

Mustang HW with #30 Cubic Foot Debris Hopper

Built for hauling insulation and large bulky debris, the #30 Debris Hopper makes it easy to haul these large loads. On lower buildings you can dump right into the dumpster with twice the capacity of other models. Lift and dump an 800 lb. load with ease while standing back over two feet from the roof edge. Hopper Capacity: 30 cu. ft. or 500 lbs.

What's even better - all your existing Garlock 600 Workhorse attachments will work on the incredible Mustang HW. Save your back - get a Mustang Hydrostat!

MUSTANG SPECIFICATIONS

Power Unit Weight.....405 lbs.	Gravel Spreader Weight.....108 lbs.
Power Unit Length.....64"	Deep Dump Hopper Weight.....110 lbs.
Power Unit Width.....65"	55 Gallon Regular Tank.....195 lbs.
Power Unit Height.....38"	55 Gallon Ins. Tank.....236 lbs.
Gravel Spreading Width.....36"	#30 Cubic Dump Hopper.....220 lbs.

CAPACITY

Power Unit with Gravel Spreader.....513 lbs.	Fully Loaded 6 cu. ft.1161 lbs.
Power Unit with Deep Dump Hopper459 lbs.	Fully Loaded1515 lbs.
Power Unit with 55 Regular Tank600 lbs.	Fully Loaded1040 lbs.
Power Unit with 55 Insulated Tank641 lbs.	Fully Loaded1081 lbs.
Power Unit with #30-Cubic Hopper.595 lbs.	Fully Loaded1125 lbs.

Where Better Engineering Comes Out On Top!™

MUSTANG HYDROSTATIC WORKHORSE

UNLEASH THE POWER OF THE MUSTANG HYDROSTAT!

The Mustang HW is the definitive name in hydraulic powered utility carriers for the professional roofing contractor. Why definitive? Because it was built to address the needs of everyone in your company from the equipment operator - to the foreman - to the mechanic and even the owner.

Thousands of roofing companies like yours have built their reputation and place in the roofing industry with signature products like the Workhorse. For 40+ years these machines have defined the way commercial roofing is done. No other piece of equipment, save the roof cutter, has had such a profound effect on our industry as the Workhorse. It is in effect - the embodiment of the industry itself.

Everything we do in roofing is continually being pushed to be faster, stronger, more versatile, less downtime, easy to operate and of course, deliver ever higher levels of return on the investment. The Mustang HW is all these things and more.

Compare the old models to the Mustang HW and you can see the difference.

Old Style Model

- Mechanical drive
- Forward power only
- Three wheels
- Pneumatic rear tire
- Handles 2" rock
- Flat handle controls
- Had over 200 parts

Mustang Hydrostatic Workhorse

- A.** Hydrostatic transmission drive
- B.** Forward & Reverse power
- C.** Four wheel stability
- D.** Flat-free tires on rear
- E.** Handles 2 1/2" rock
- F.** Ergonomic controls
- G.** Has 25% fewer parts to adjust/replace
- H.** Remote oil drain
- I.** Fan cooled transmission
- J.** Water bottle holder

Add to all this that the Mustang HW is built like a brick outhouse and you can be assured of the same high degree of productivity, performance and ROI that you've come to expect from all Garlock products.

Ask any operator of an old style workhorse how hard it is to go in reverse. With Mustang's 4-wheel stance you are no longer trying to fight that single rear caster wheel when it spins around. It's hard work on old models and many times rolls the tire right off the wheel because of the weight. The Mustang HW system balances the weight evenly on four wheels and the casters literally spin on a dime.

Whether you're going up a ramp fully loaded with gravel or driving across an open roof loaded with debris the Mustang HW delivers the full power of the engine to the drive wheels.

Mustang HW is equipped with a 5 1/2 hp Honda engine. Unmatched for rugged dependability and easy one-pull starting. Whether you're filling a hot tank or picking up a load of gravel at roof edge the Mustang HW delivers the control you need with absolute precision. Inch forward at a snails pace, decelerate to a smooth stop or stop instantly on a dime - reverse is just easy and precise.

The automatic throttle mechanism allows the operator to control the speed of the machine with the slightest finger touch. Designed with ergonomic comfort and control in mind, the operator simply squeezes the speed control to speed up or releases it to stop. To go in reverse put your hand inside the handle guard and squeeze handle. There is never any confusion about which way you are going to move.

Contractor appeal for the Mustang Hydrostatic Workhorse is in its versatility. Four attachment options allow the contractor to carry hot asphalt, dispense gravel or haul debris with two hopper sizes.

Mustang HW with 55 gallon Hot Tank

Mustang carries the hot to your dispensers instead of your dispensers running after the hot. Equipped with heavy-duty support arms the Mustang HW offers an effective, safe way to fill dispensers and buckets. Hot Tank Capacity: 55 Gals.

Mustang HW with Deep Dump Hopper

Mustang also carries a tall-sided, narrow profile dump hopper that is perfect for carrying felts, gravel or tearoff debris. The long narrow opening works great for use with trash chutes and the operator can dump the load without standing right next to the roof edge. Dump Hopper Capacity: 1000 lbs.
