

No. 12 Scratcher

This rugged, motorized scraper is designed for patch jobs, for scraping close to walls and expansion joints and for areas on the roof that are difficult to get to. A heavy

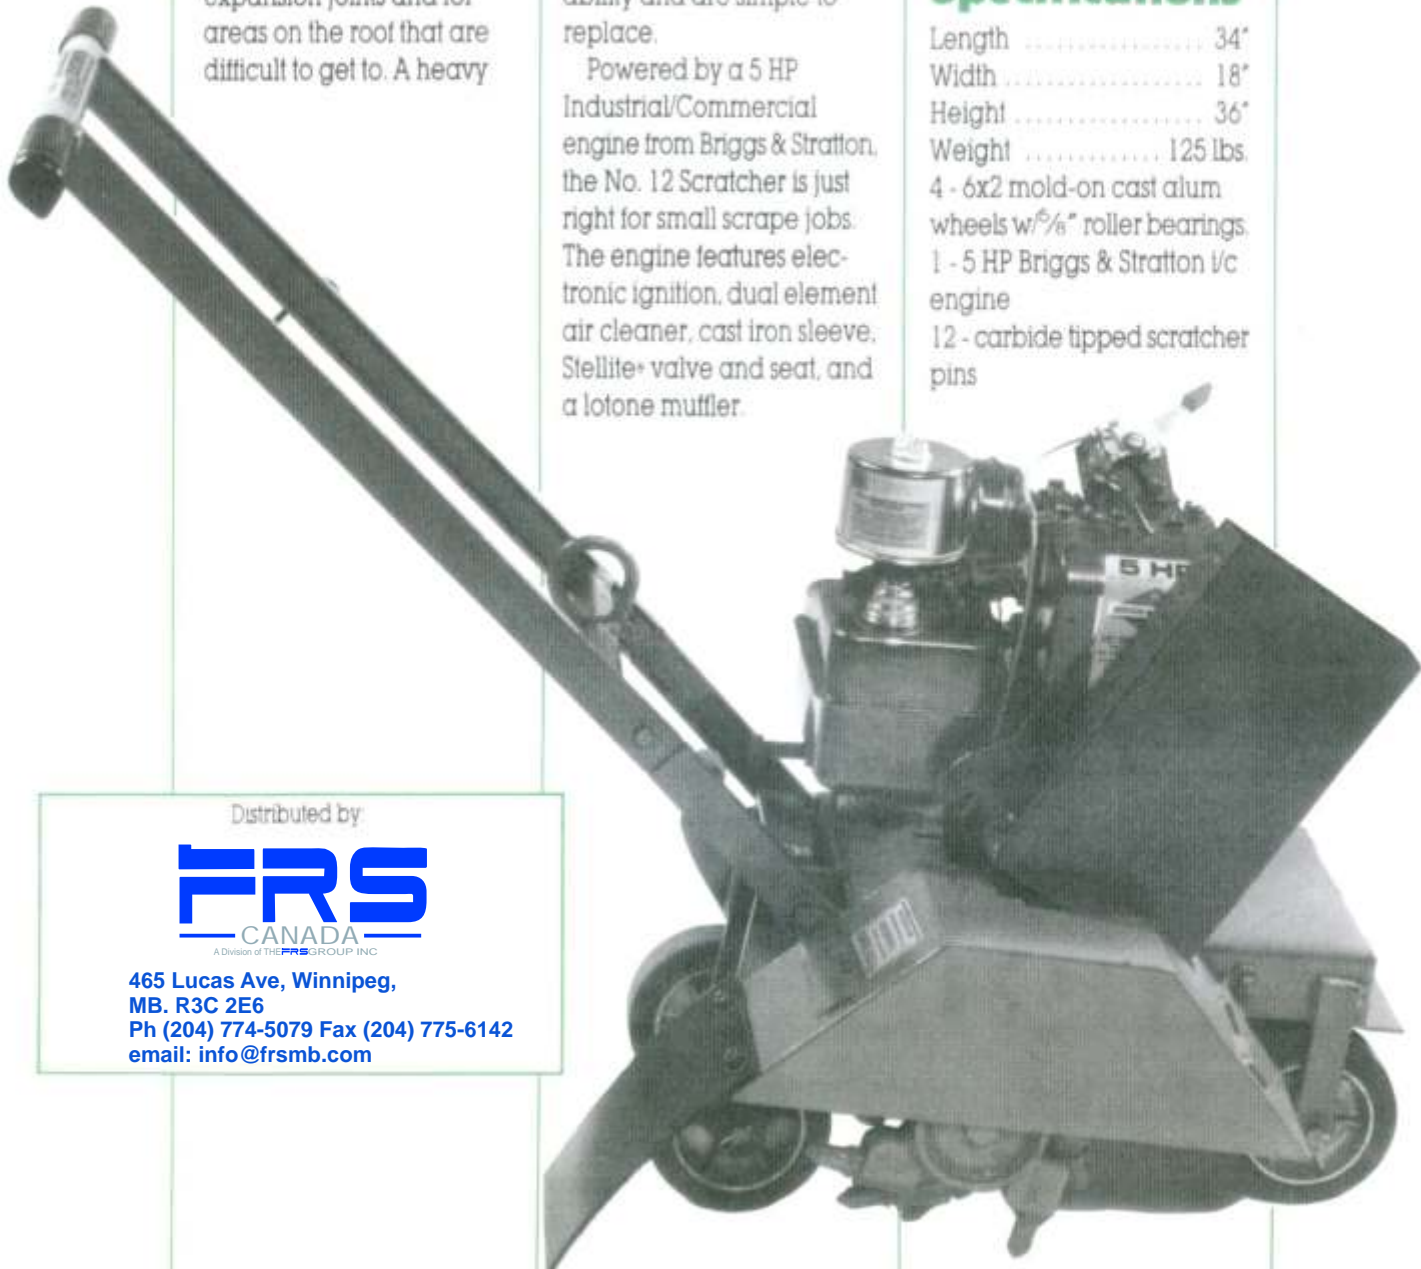

welded drum holds twelve carbide pins that scrape a path 4 1/2" wide. The scratcher pins have excellent wearability and are simple to replace.

Powered by a 5 HP Industrial/Commercial engine from Briggs & Stratton, the No. 12 Scratcher is just right for small scrape jobs. The engine features electronic ignition, dual element air cleaner, cast iron sleeve, Stellite® valve and seat, and a lotone muffler.

Simple to operate, just push down on the handle to scrape.

Specifications

Length 34"
Width 18"
Height 36"
Weight 125 lbs.
4 - 6x2 mold-on cast alum wheels w/5/8" roller bearings.
1 - 5 HP Briggs & Stratton i/c engine
12 - carbide tipped scratcher pins
